1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wan '950 in view of Kwok '624.

It would have been obvious to form the walls of Wan from translucent material, to allow for better viewing of the items, as taught by Kwok. Dimensions and relative dimensions are considered to be a matter of choice and design.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leanard '510 in view of Bell.

Shapes are generally considered to be a matter of choice and design, and it certainly would have been obvious that Leanard could have been formed with generally cylindrical walls, as taught by Bell.

4. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The patents to Albaugh, Ng, Denholtz, Belanger et al., Frey, and the publication to Repisky are cited to show similar structures.
